

## OUR MISSION

The mission of KaratCoin Bank is to create and develop a global infrastructure that will become a bridge between conventional and cryptocurrency financial systems. This will make KaratCoin Bank the center of the future economy built on blockchain technologies.

KaratCoin Bank is currently creating an international payment system that will serve the blockchain-based economy.

Nowadays, the foundation of the future global structure that will evolve into the stabilizing center of the world economy is being actively laid. It is currently based on the following projects: Karatbars International GmbH, KaratGold Coin, KaratCoin Bank, KaratPay System and KaratGold Coin Exchange that state as links of a single gold chain.

Adherence to its mission will empower KaratCoin Bank to achieve maximum capitalization for the benefit of its backers.

## OUR VISION

KaratCoin Bank is based on a clear vision of the future new economy and blockchain-based financial operations that will be much fairer than the existing ones.

A full-fledged functioning of the global financial ecosystem based on KaratCoin Bank will be the core of the infrastructure being created.

Eventually, this ecosystem will become the basis for the creation of a new financial world based on blockchain technologies where any intermediaries will be completely excluded.

KaratCoin Bank will become the basis of an environment efficient and beneficial for introducing a new economy.

The key point of KaratCoin Bank's vision is the consistent incorporation of real money which, unlike the fiat ones, will hold real value and will be backed in gold, thus making economic relations more productive.

KaratCoin Bank will make a cryptocurrency backed in gold the standard and will successfully make it mainstream currency. This will be achieved by building up a comprehensive environment that will meet all and any needs of users.

Due to these global changes and visionary activities, KaratCoin Bank will lead the process of conventional economy transformation and will become the financial leader of the new economy based on the blockchain.
